INTRODUCTION

JOIN US IN BUILDING DIGITAL WEALTH

CubYield's ecosystem starts with foundations and build on each other. Security, Scalability, and Decentralization. CubYields adoption is powered by the qualified community of CubToken's ecosystem.

What is CubYield?

CubYield is a blockchain-based “BEP20” asset with similar functionality to bitcoin, ether, and bitcoin cash: it can hold value and be sent and received. The main difference between CubYield and other cryptocurrencies is that CubYield was deployed and hosted on the Binance Smart Chain, considering that bitcoin and bitcoin cash are the native currencies of their respective blockchains. CubYields are stored and sent using Smart Chain addresses and transactions and it has cheap transaction fees in comparison to Ethereum and others.

Why CubYield

The CubYield asset “BEP20” is the token standard of Binance Smart Chain. In many ways, it’s similar to Ethereum’s CubToken “ERC20” standard; in other ways, it expands on it. Just as Ethereum has gas fees, BNB pays for the transactions involving CubYield tokens on Binance Smart Chain’s network and is 95% cheaper. CubYield was designed to enhance the staking dynamic for the CubToken ecosystem and community.

Where Does CubYield Value Come From?

CubYields value comes from integrating onto platforms that facilitate exchanges between CubYield and other Cryptocurrencies. CubYields liquidity through Decentralized platforms that utilize automated market makers (AMM) systems like Pancake play a key role in the value. Supply and demand, red and green crypto markets, buying, selling, sending, bots, liquidity pools, and things like these are just a few of many variables that give CubYield its value.

What is CubYield?

CubYield first deployed in June of 2022. CubYield was created to help bridge the gap of understanding between the centralized mindset and the decentralized movement. CubYield is a part of a Crypto-Friendly Web 3.0 Verification Badge “NFT” network. This badge identifies Web 3.0 crypto friendly interfaces as accepting and supporting blockchain technology. CubYield crypto to cash integration through the ChingUp platform is CUBY first utility use case.

WELCOME TO CUBYIELD

CubYield was created in June 2022 with the goal of being a decentralized project with true purpose.

CubYields mission is to bring popular cryptocurrency concepts to the mainstream. Unlike older, comparable projects, CubYield introduces holders to next-gen concepts such as frictionless yield, NFTs, decentralized exchanges, and crypto to cash instant deposit.

The CUB Force consists of volunteer community members that support project growth indefinitely.

Cub Pool consists of 30 Trillion CubTokens being distributed via marketing campaigns that include introduction to CubYield.

CUBYield “bep20” bridge will bridge with CubToken “erc20” and help in completing the ecosystem.

CubYields Purpose...

SELF GENERATING LIQUIDITY -

VALUES

TRANSPARENCY

CubTeam encourages our community members to do their own research. The research of the CubYield will result in findings of all the information needed in order for each individual to gain confidence in the support of this project.

COMMUNITY

Ultimately, CubYield is owned by the community, meaning we encourage group efforts related to marketing, development, community management and more.

TRUST

In the cryptocurrency market, Trust is paramount. That means not only providing transparency, but also security related to holder funds. Examples include audits of CubYield code, and liquidity tokens being burnt to eliminate risk of malicious behavior.

LONGEVITY

CubYield is in it for the long haul. Our plans are for long-term development of the ecosystem which result in an investment beyond any temporary trends.
